TECHNICAL PROJECTS

BUDGETBUTLER.CO – GITHUB | DEMO

A platform to budget money and analyze spending habits with real-time chart generation

- Used React and Redux to manage application state and provide instant on-screen updates
- Formed custom database queries to filter transaction data based on month and year
- Imported Chart.js to present visual comparisons and make personalized recommendations about spending
- Employed Javascript Web Token with Ruby on Rails to authenticate users and maintain session state

PUDDL.R.CO – GITHUB | DEMO

An easy way for people to find carpools for their commute to work

- Implemented using RSpec Test Driven Development process to guarantee functional and maintainable code
- Created custom validations to control flow, ensure clean data, and display error messages to the user
- Produced analytics using ActiveRecord queries through diligent domain model planning
- Designed a responsive user interface with custom CSS to accommodate varying screen sizes and input methods

BATTLEOFWITS.CO – GITHUB | DEMO

An online trivia game where friends can compete

- Utilized AJAX requests to render seeded trivia data returned from a Ruby on Rails helper API
- Designed front-end using Materialize framework with custom CSS
- Built Ruby on Rails API to allow for random gameplay through question database

TECHNICAL SKILLS

Ruby, Rails, Rspec, PostgreSQL, HTML5, CSS3, JavaScript, jQuery, React, Redux, Git, Trello

PROFESSIONAL EXPERIENCE

INVESTORS BANK – *Brooklyn, New York*
